Summary

Cybersecurity bachelor's student pursuing SOC Analyst and Cybersecurity Analyst opportunities, with hands-on experience building an isolated Wazuh home lab and verified coursework in network defense and data analytics. Skilled in alert triage, Linux and Apache log analysis, detection validation, custom rule development, and MITRE ATT&CK mapping.

Technical Skills

Wazuh SIEM/XDR | Alert Triage | Log Analysis | Linux | Apache | rsyslog | UFW | VirtualBox | Network Security | Endpoint Security | Digital Forensics | Enterprise Security | Threat Assessment | Data Loss Prevention | Information Security Management | MITRE ATT&CK | Data Analytics | Data Visualization | Database Queries | Spreadsheets | R | Python | Critical Thinking | Written Communication

Education

University of Phoenix, Phoenix, Arizona

Bachelor of Science in Cybersecurity | Expected May 2028

Academic Honors: President's List (1) | Dean's List (2)

Honor Societies: NSLS | Epsilon Pi Tau (Delta Sigma Chapter)

IT Related Coursework: Ethical Hacking | Network Security | Data Security | Vulnerability Assessment | Enumeration and Network Scanning | Operating Systems

Credentials

Cloud, Wireless, & Threat Response Tactics | University of Phoenix | Apr 2026

Endpoint & Data Protection Strategies | University of Phoenix | Mar 2026

Google Data Analytics Professional Certificate | Coursera | Apr 2025

Key Projects

SOC Monitoring and Threat Detection Home Lab | 2026

Designed and operated an isolated virtual environment to generate, collect, and investigate security telemetry using a repeatable SOC workflow.

- Deployed Wazuh 4.14.7 and an Ubuntu 24.04 web server on a VirtualBox NAT network; configured Apache, rsyslog forwarding, UFW controls, and centralized monitoring.
- Generated and investigated five controlled scenarios: SSH password guessing, SQL injection, directory traversal, a blocked TCP/8080 connection, and failed sudo privilege escalation.
- Validated source logs and Wazuh alerts, analyzed rule IDs and severity levels, mapped relevant MITRE ATT&CK techniques, and created and tested custom Wazuh rule 100100 for UFW BLOCK events.

Cybersecurity Portfolio and Incident Documentation | 2026

Converted home-lab evidence into employer-facing case studies that document objectives, procedures, observations, analysis, remediation context, and lessons learned.

- Authored five downloadable SOC investigation reports with screenshots, detection details, MITRE ATT&CK context, and official vendor references.
- Built and published a responsive GitHub Pages portfolio that presents lab architecture, technical capabilities, evidence, and case-study downloads.
